

STANDARD ROTARY CAGE FLOOR MOUNTED CABINET WASHER
Throughput of upto 10 wash cycles per hour
Wash chamber will accommodate one container + lid per wash

Wash items are LiquiFold IBC plastic containers

External dimensions – 44" wide x 48" long x 44½" high with a tare weight of 225 lbs

SIMILAR IWM IBC WASHING MACHINE

ONE IWM Rotary IBC cabinet type washing machine with

Recirculated hot detergent wash at 50 - 60°C +
Mains ambient fresh water rinse

Machine includes rotary cage mechanism and 360° wash/rinse system

Two access swing doors – one for an IBC and one for the lid

Electrics are 400 volt, 50hz, 3phase + N&E unless other specified

Machine construction is of a heavy-duty stainless steel design enabling fork truck loading and unloading of the IBC's as required

A combination of the powerful wash followed by a **hot** rinse and rotary action on the IBC carried out over a 5 - 10 minute cycle ensures excellent wash performance, complete drainage and normally gives reasonable drying via residual heat
