Handheld Totes & Containers

Saeplast manufactures a wide range of handheld totes and containers to meet industry requirements for strength, user friendliness, environment, and hygiene. All Saeplast containers are produced from food-grade raw materials and comply with stringent food safety standards.

Carts & Buggies

Specifically built to withstand the rough handling in the food processing industry the Saeplast **wheeled carts and buggies** are designed with strong, insulated triple walls and are ideally suited for handling both wet and dry goods. The sturdy undercarriage construction, nylon wheels, stainless steel axles and ergonomic handles have been designed for easy maneuverability, handling, and cleaning.

Insulated Fish, Meat and Poultry Containers

Strong, long-lasting and easy to handle the Sæplast **insulated fish, meat and poultry containers** are particularly well suited for handling of poultry and fresh seafood in transportation and market settings. The primary benefit of PUR containers is temperature retention and control. PUR refers to the polyurethane insulation injected into the walls of the tubs, ensuring a very high insulation factor. The one-piece seamless design and smooth walls improves hygiene control.

Insulated Plastic Containers

Developed with a unique technique that ensures effective adhesion between the polyethylene walls and the polyurethane insulation for long-lasting structure. Saeplast's [insulated plastic containers](#) are used in many industries that require temperature control of frozen, fresh, and processed food. Commonly used as an icebox, fish box, meat, poultry, food recycling container or to handle salted fish and raw materials like salt and ice.

Insulated Seafood Containers

The Saeplast insulated seafood containers are seamless rotomolded double-walled containers. These storage tubs are used in many industries that require temperature control of frozen, fresh, and processed food. These containers are commonly used for handling of poultry and fresh seafood in transportation and in market settings; on board lobster boats for harvesting live lobster, cod, white fish, salmon and many other species.
