Plastic Pallets

Tote Solutions Ltd.

Nestable plastic pallets are ideal for material handling operations in warehouses, distribution centers, or closed loop supply chains. Dimensional consistency makes plastic pallets compatible with high-speed automation systems. When empty, plastic pallets nest atop one another for cost-effective return freight and storage space use. Nestable plastic pallets do not rot, splinter, or grow mildew - allowing for extended service life and minimal maintenance requirements

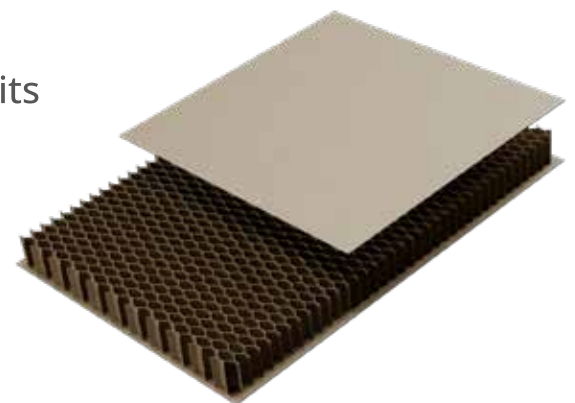

Tote Solutions Ltd.

Cardboard Honeycomb Pallet

LM Packaging has designed a resistant, versatile, and lightweight honeycomb pallet made from a cardboard sheet and blocks that is very similar to a standard wood pallet. Ideal for the safety of your employees, cardboard pallets are light and easy to handle. In addition to reducing your shipping costs, they are fully recyclable, which will allow you to make your space more cost-effective.

Product Features

- No residue or mold.
- No treatment or certification required.
- Manufactured from non-tree renewable sources.
- Highly reduces risk of injury.
- Fits in standard racking systems.
- Two-way and four-way formats available.
- Customizable by printing.
- Ultralight product with an unbeatable weight to strength ratio.
- Supports an evenly distributed load of 10 000 lbs.
- Significant savings on transportation costs due to its light weight.
- No disposal fees.
- Approved for food industry use.
- 100% recyclable.

Universal Multi-Trip Plastic Pallet

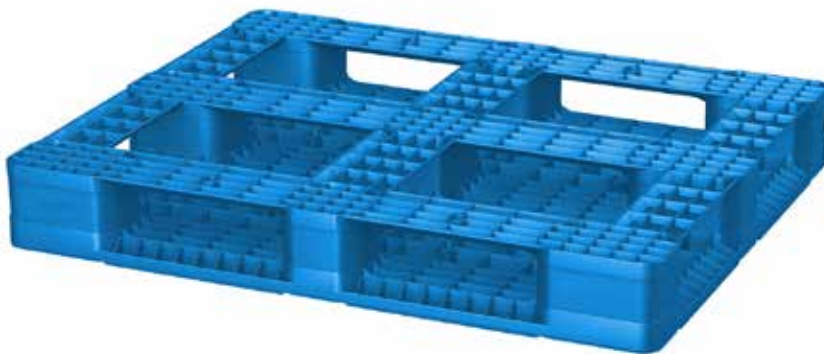

Tote Solutions Ltd.

The Eco US5 has been engineered as a multi-trip plastic pallet that offers high performance and durability. It is universally applicable in closed loop production plants and goods distribution. Plastic rackable pallets allow for optimized storage and warehousing without losing available floor space, as bottom runners allow for pallets to sit safely on top of a rack. The high impact strength of this plastic pallet significantly reduces the risk of damage with such improper handling and thus extends the service life.

Product Features

- Dimension 48" x 40" x 6"
- HACCP compliant
- FDA approval
- Net weight starting at 31 lbs.
- Open deck or closed deck options.
- Metal reinforcements available.
- Fits in standard racking systems.
- Four-way entry format.
- 3 runner or 6 runner bottom supports.
- Colour options available.
- Dynamic loads of up to 5600 lbs
- Racking loads of up to 2800 lbs

Tote Solutions Ltd.

NestRack Plastic Pallet

Due to the special design, the new NestRack© plastic pallet is nestable and at the same time suitable for high rack storage. With a net weight of only 22 lbs, the pallet can carry up to 2700 lbs with evenly distributed load in racking. A revolutionary weight-to-load ratio. The runners ensure smooth transport on roller and chain conveyors and offer 4-way access for forklift trucks

Product Features

- Dimension 48" x 40" x 5"
- Net weight starting at 22 lbs.
- Open deck or closed deck options.
- Fits in standard racking systems.
- Four-way entry format.
- 4 runner bottom supports.
- Colour options available.
- Dynamic loads of up to 5600 lbs
- Racking loads of up to 2700 lbs
